Instruction No. 31/MON/2007

From

D.G.M./Monitoring,
DHBVN, Hisar

To

All CGMs (OP)/GMs(OP)DGMs /AGMs (OP)
in DHBVN.

Memo No:-Ch-97/MON-260

Dated:- 24/05/2007

Subject: Release of new industrial connection – Industrial Associations to aid the Nigam in load Planning

It has been observed that the various industrial connections being applied by the new consumers to respective AGM/DGM (OP) for sanctioning of load and release of connection are not being intimated to the planning wing of the Nigam. In such a scenario the necessary planning for improvement of the S/Stn. and 11KV feeder from where the supply is to be fed to the new industrial consumers can not be done, with the result that suddenly there is a consumer and utility is not ready to give him connections.

As per this office Instruction No. 25/MON-2007 dated 20.3.07, a regular meeting with industrial association is being made/arranged on 7th of each month by GM/DGM (OP) under monthly calendar of field activities. With a view to ensure better load planning and to ensure quality supply to the consumers it has been decided by the Nigam that during meeting with Industrial Association i.e. on 7th of each month an agenda item on prescribed format shall be discussed/obtained from the Industrial Association Members attending the meeting with regard to new industrial connections. The associations shall intimate the fact of any new buildings under construction, any fact of sale and purchase of property and estimated load of prospective consumer and the detail of Substation/11KV feeder from where the supply will be fed to such prospective consumer.

The information shall be obtained on the following format and sent to CGM/P&D, DHBVN, Hisar every month.

Name of Divn.	Name of new Industrial Consumer (Purchased property/ or leased property/ or building under construction)	Anticipated load of the prospective consumer	Name of S/Stn. from where the supply will be fed.	Name of 11 KV feeder from where the supply will be fed	Expected date of connection	Running max. current on S/Stn (T/F).	Running max. current on 11KV feeder.
---------------	--	--	---	--	-----------------------------	--------------------------------------	--------------------------------------

It shall be ensured that above information on the prescribed performance shall be furnished by G.M. (OP) to CGM/P&D every month positively otherwise the concerned G.M. (OP) will be held responsible for the consequences.

This issues with the approval of MD, DHBVN, Hisar.
