

DAKSHIN HARYANA BIJLI VITRAN NIGAM

Instruction No. 53/MON/2011

From

The Coordinator,
DHBVN, Hisar

To

All CEs (OP)/S.E./(OP)/XENs (OP)/SDOs(OP)
JEs-I Incharge in DHBVN.

Memo No: **Ch- 17/MON-260/V-II**

Dated: **04.05.2011.**

Subject: Loss reduction on high loss feeders under DHBVN.

It has been observed that the losses under DHBVN are running on higher side due to one or the other reason which is causing heavy revenue loss to the Nigam. The losses on some of the feeders have been noticed to be on very higher side, even above 70%. It is very essential to reduce the losses of high loss feeders. It has been decided by the management that 1 No. high loss feeder be allocated to each JE under his jurisdiction for reduction of losses for which he will be responsible in person.

Accordingly 1 No. high loss feeder out of total feeders being supervised by the JEs under each circle has been selected and the current losses have been mentioned against each. All JEs will take further necessary action to reduce the losses for the feeder allocated to them within next four months. The circle wise / JE wise feeders allocated is enclosed as annexure-A.

All GMs /DGMs / AGMs (OP) shall issue the necessary guidelines / action to be taken for reduction of losses to all the JEs under their jurisdiction, specifically the following activities shall be carried out.

- i) The accuracy of all the meters installed on the feeders be checked with the help of accuacheck for proper recording of energy.
- ii) All the meters found defective shall be replaced with healthy meters.
- iii) All the cuts on the PVC / service cable shall be removed.
- iv) The raids on the theft probe areas be conducted and action as per instructions be taken.
- v) The defaulting amount from the connected/ disconnected consumers be recovered.
- vi) Maintenance of all the transformers of the feeders be carried out.

- vii) The replacement of old wire/ conductor be made with proper size.
- viii) Earthing of all the transformers shall be checked / provided.
- ix) Balancing of all the three phases of distribution transformers be made.

It has been noticed that the losses on the feeders are variable from feeder to feeder/ circle to circle, so it has been decided to fix the target for percentage reduction in losses as under.

- a) The feeders having losses above 80% shall be reduced to 25%.
- b) The feeders having losses 60% to 80% shall be reduced by 20%.
- c) The feeders having losses 50% to 60% shall be reduced by 15%.
- d) The feeders having losses 35 % to 50% shall be reduced by 10%.
- e) The feeders having losses 25% to 35% shall be reduced by 8%.
- f) The feeders having losses less then 25% shall be reduced by 5%.

All the GMs/DGMs/AGMs shall take immediate necessary action for reduction of losses in all the feeders by the JEs under their jurisdiction within four months to the extent target fixed as above. In case the targets for reduction of losses are not achieved in any office then disciplinary action against AGM/JE will be initiated. The progress of each JE shall be reviewed by the AGM every week and by GM/DGM fortnightly so as to ensure to achieve the feeder wise target fixed. In case any AGM/JE (feeder manager) is not taking the interest for reduction in losses then recommendation for taking necessary action against the officer/ official shall be made to CGM/HR Admn by the GM/OP concerned.

The CGMs/OP shall review the JE/ feeder wise progress during ORCs being conducted by them and furnish the status in the Minutes of Meeting. All the senior officers visiting the field offices shall also review the progress of feeders and mention the clear cut status with their comments in their inspection reports.

It shall be ensured that above instructions are complied with meticulously with immediate effect

This issues with the approval of MD, DHBVN, Hisar.

DA/Annexure-A.
