To

All CEs/SEs/XENs/SDOs/OP,
JEs-I, Incharge Sub office, in DHBVN.

Memo No. Ch-35/SE/Comml./R-17/356/2005/F-18
Dated: 22/10/2019

Subject: Release of Pending HT connections in the lean period.

Keeping in view the large pendency due to system constraints, the Nigam has decided to release the pending HT connections of all categories up to the load of 500 KVA wherever capacity is available during the present lean period. In order to rule out any apprehension of overloading during peak season, an undertaking from such consumer shall be taken in the form of an affidavit that, if required, his load shall be restricted wholly or partially to avoid overloading of the system. SDO (OP) concerned is competent to allow the release of such connection. However, it must be ensured that loading on power T/F does not exceed permissible limit allowed by Nigam under any circumstances.

It is further decided that seniority of the HT connections shall be maintained S/Stn. wise by the SDO concerned. The above facility to release the connections upto load of 500 KVA during lean period shall remain in force upto 31/03/2020.

Moreover, this relaxation shall also be applicable to extension of load cases under HT category subject to ceiling of total sanctioned load upto 1 MVA.

For illustration, if the consumer having sanctioned load of 400 KVA applies for extension of another 500 KVA load then the load to be sanctioned under this scheme shall be 400+500 KVA i.e. 900 KVA. However if the consumer is having sanctioned load of 700 KVA and applies for extension of another 500 KVA then the load to be sanctioned under this scheme shall be 700+300 KVA i.e. 1000 KVA (being ceiling of 1 MVA).

The new connection presently been released under this circular shall not be eligible for further extension of load under this scheme.

The above instructions should be brought to the notice of all concerned for careful and meticulous compliance with immediate effect.
